Host Agency: _____

Course Overview

This 8-hour training program teaches police officers, corrections professionals, investigators, and analysts how to safely and effectively use modern artificial intelligence tools in real-world public safety work. The focus is practical application: report writing, investigative research, intelligence development, workflow improvement, and responsible AI use.

Course Outline

- Understanding generative AI in public safety
- AI-assisted report writing and documentation
- Intelligence gathering and open-source research
- Practical prompting techniques for ChatGPT, Gemini, and Copilot
- Investigative workflow improvement
- Criminal use of AI and investigative indicators

- Verification, hallucination risks, and responsible AI use

Audience

Law Enforcement • Corrections • Investigators • Gang Units • Criminal Intelligence Analysts • Court Staff

Host Agency Requirements

- Classroom seating for attendees
- Projector or large display screen
- Internet connection recommended but not required
- Standard 8-hour training block
